

SECURITIES FINANCE PLATFORM SOLUTIONS

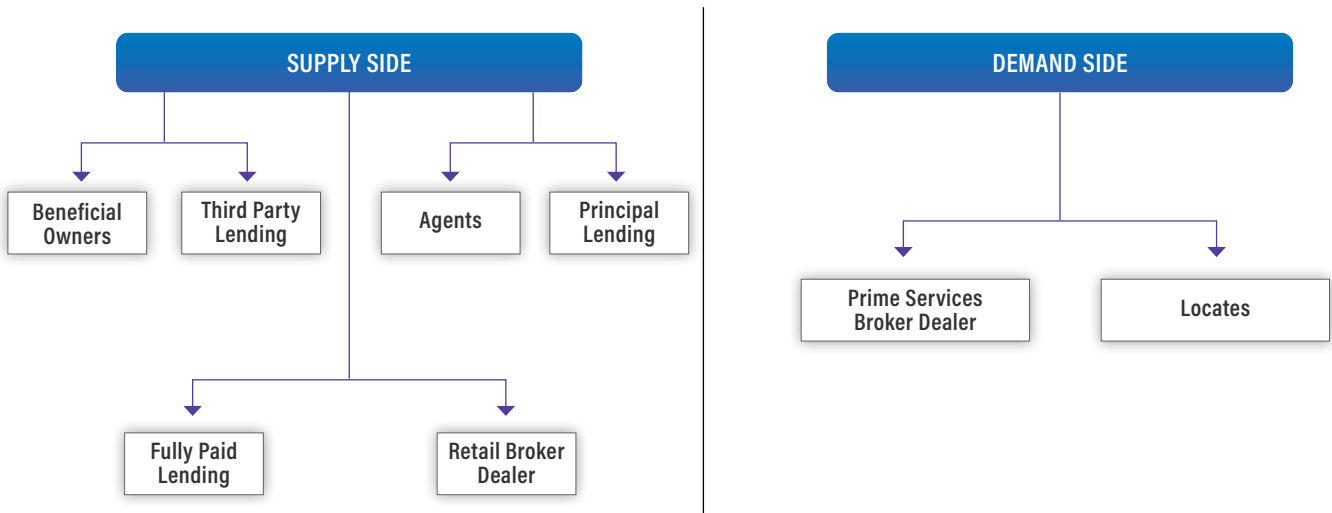

EquiLend Spire is a state-of-the-art platform that can be deployed modularly to complement your current system stack or as a complete front-to-back solution to replace multiple disparate systems. Either way, EquiLend Spire will support business growth, provide scalability and transformative contributions to your securities finance business.

EquiLend Spire delivers efficiency to your business, replacing manual tasks with automated processes. The platform ties in seamlessly with our Trading, Post-Trade, RegTech and Data & Analytics Solutions, as well as a variety of other systems, market infrastructures and securities finance service providers including DTC, SWIFT, Pirum and Loanet. EquiLend Spire's multi-asset and currency capabilities allow firms to manage their complete, global securities finance book in one central location.

EquiLend Spire allows users to leverage an industry-leading, front-to-back securities finance platform that natively ties into EquiLend's many automated trading and post-trade solutions to optimize and efficiently process and record transaction data with pinpoint accuracy and unmatched speed.

At the core of EquiLend Spire are transparency, accessibility and adaptability to evolving global compliance requirements, ensuring timeliness of data and productivity of workflow to efficiently manage your business. EquiLend Spire is a global platform supporting clients in the US, Canada, EMEA and APAC regions.
